

Nguyen Minh An

AI Backend Engineer | Ho Chi Minh City, Vietnam

Email: an.nguyen@example.com | Phone: +84 900 123 456 | GitHub: github.com/minhan-ai

SUMMARY

AI backend engineer with 4 years of experience building FastAPI services, LLM-powered workflows, PostgreSQL data models, and production-style evaluation pipelines. Strong background in Python, TypeScript, semantic search, pgvector, prompt engineering, and reliable API design.

CORE SKILLS

Python, FastAPI, SQLAlchemy, PostgreSQL, pgvector, Redis, Docker, GitHub Actions, TypeScript, Next.js, React, OpenAI-compatible APIs, Gemini, LLM evaluation, JSON schema validation, prompt engineering, RAG, sentence-transformer embeddings, pytest, mypy, ruff, REST APIs.

EXPERIENCE

AI Backend Engineer - JobFit Labs - 2022 to Present

- Built schema-first resume and job parsing workflows with Pydantic validation and JSON repair.
- Implemented hybrid semantic and lexical matching using sentence-transformer embeddings and pgvector.
- Designed truth-guard checks to prevent unsupported resume rewrite claims.
- Created evaluation reports for parser quality, semantic matching, and truth-guard reliability.
- Maintained CI quality gates with pytest, mypy, ruff, and GitHub Actions.

Backend Developer - SaaSWorks - 2020 to 2022

- Delivered FastAPI and PostgreSQL services for analytics dashboards and internal workflow tools.
- Improved API reliability with async SQLAlchemy, typed schemas, and automated regression tests.
- Containerized local development using Docker and documented deployment runbooks.

PROJECTS

JobFit AI: A resume-to-job matching product with document ingestion, LLM extraction, embedding retrieval, explainable evidence rows, ATS keyword coverage, and markdown export.

EDUCATION

B.S. Computer Science, University of Technology, Vietnam.

LANGUAGES

Vietnamese native, English professional working proficiency.
